## DVNLP & GNLC hide suspected Sex Offender

by Thies Stahl, 27.12.2017, update 17.01.2020<sup>1</sup>

With the new foundation of their "Society for Neurolinguistic Coaching e.V. (GNLC) as a parallel, competitor or successor club of the DVNLP, Cora Besser-Siegmund offers DVNLP members a new club home. After their practitioner training, they will complete a two-day additional training course on myostatics testing, the core of her NLP-based wingwave method.

Those DVNLP members who are considering moving to the GNLC because of the violations of the statutes and laws and derailments in the context of an abuse complaint in their association should perhaps know that with all the new and colourful things they hope to find in their new GNLC clubhouse, they will probably not be spared a certain continuity in the bad: In terms of denying, concealing and covering up sexual and power abuses, they are moving from the frying pan into the fire.

### "Perpetrator Protection" Associations

While the "active protection of offenders" in the DVNLP has only been introduced as a generally accepted practice in recent years, Cora Besser-Siegmund already practised it quietly when she founded her new GNLC by not only accepting into the GNLC without hesitation a hidden addressee of an abuse complaint suppressed in the DVNLP, but even accrediting him as a GNLC teacher trainer. The person in question, the alleged sex offender XY<sup>2</sup>, the main person of the nuclear conflict of the "Causa DVNLP"<sup>3</sup>, was and is hidden from the public in the DVNLP until today. The

<sup>2</sup> I have made his name anonymous here, as in my other texts, with XY.

<sup>3</sup> *"The perverse triangle as a recursive pattern in the DVNLP", "Violence, abuse, double standards and the return of the repressed in the DVNLP", "DVNLP abandoned by all good spirits? predetermined breaking point fascistoid-totalitarian slips and loss of self-control", "The NLP and the madmen. The DVNLP corrupts its method", "My beautiful delinquent German Association! DVNLP completes perpetrator-victim conversion", "Perpetrator Association DVNLP - Silence, Denial and Repression", "DVNLP + GNLC hide suspected sex offender" and "Psychiatry. Not funny", as well*

DVNLP is also keeping the file with the association's internal derailments and embarrassing particularities of this case under lock and key.

So now XY has disappeared into the GNLC, which thus also recommends itself as a "protection of perpetrators" association. His double membership in DVNLP and GNLC, as exemplified by Cora Besser-Siegmund, gives XY a certain immunity as NLP and NLC instructor and increases his chances of generally remaining unmolested: He is held in office and dignity in both psycho-method associations as NLP, NLC and Wingwave teaching trainer and coach, but is protected, covered and hidden from the public as a psychologically unstable and allegedly dangerous and violent abuser.

According to the current state of the legal proceedings<sup>4</sup>, the DVNLP and GNLC teacher trainer XY has a certain chance to stay that way thanks to Cora Besser-Siegmund:

- The complainant and I are prohibited by injunctions supported by the DVNLP from publicly naming the material of his crimes against sexual self-determination to the detriment of her and her children, which he is accused of in the complaints suppressed by the Board.
- The investigations against XY and the other suspected members of the paedocriminal offender system from which she had withdrawn as a testifying key witness were discontinued.
- The proceedings between the public prosecutor's office and the complainant for libel against XY were also discontinued on 14 November 2017 with the consent of the State Financial Procurator's Office and the complainant. A conspicuously "perpetrator-friendly" expert opinion on the guiltiness of the defendant, which was ordered for these proceedings, now lies in the basement of the court. In addition to inadmissible references to my person, which the psychiatrist was forced to omit in a second version, it used the files of the LKA and the StA as the essential basis of its abstruse diagnostic argumentation<sup>5</sup>, in which the synchronization of the pathologization by the DVNLP with the psychiatric attempt of the perpetrator system, which was carried out by a criminal manipulation of the communication with the authorities,<sup>6</sup> is clearly recognizable.

## Double membership for offenders

With the continuation of the denial and perpetrator protection culture in her GNLC, for which she is co-responsible in the DVNLP, Cora Besser-Siegmund has created an unfavourable, mutually stabilising continuity for these two psycho-method associations with regard to their basic policy:

*Sacrifices must be made for the prosperity of business with the methods NLP, NLC and Wingwave on the psycho-market of trainings, therapies and coaching.*

This virtual imperative, which is derived from the actions of Cora Besser-Siegmund and her "Causa DVNLP"-members,<sup>7</sup> seems to be valid also, and especially, when it comes to human sacrifices and victims of humanity, e.g. when the sacrifice to be made - as happened in the DVNLP - sometimes even requires the members to disenfranchise other members completely, i.e. to deprive them of their membership and human rights and even of their dignity by using physical violence.

Such a policy, as it has been lived in the DVNLP since the manipulation and deception of the general meeting by the board of directors in 2014 and presumably taken over by Cora Besser-Siegmund for the GNLC, results in considerable damage to the NLP, and thus also to the NLC, in terms of corridor and erosion<sup>8</sup>: The association officials of both associations, who have become amnesiacs for their exemplary function, have sacrificed the NLP basic concept of ecology<sup>9</sup> and thus committed treason at the heart of the NLP.

Without naming it, or even reflecting on it, DVNLP and GNLC seem to orientate themselves here at the proven practice of the Catholic Church<sup>10</sup>: For the sake of the

---

<sup>7</sup> The breaches of statute and law and the other, in part criminal, derailments of the "DVNLP case" contributed to this: The current honorary members Martina Schmidt-Tanger, Dr. jur. Jens Tomas, Cora Besser-Siegmund and Dr. Franz-Josef Hücker, as well as the current DVNLP honorary prize winner Stephan Landsiedel and the spokesperson of the Mediation Section, Anita von Hertel, and the then spokesperson of the regional group SH/HH of the DVNLP, Petra P..

<sup>8</sup> See footnote #21, also in my article "*The NLP and the madmen. The DVNLP corrupts its method*" is about this topic and its effects in the practice of DVNLP practitioners.

<sup>9</sup> See footnote #27.

<sup>10</sup> Here another one than the perhaps already too much strained analogy "Abuse and the Catholic Church": In Stalinist Russia for a while the motto applied that there would be no more sexual crimes because communism was a way of life in which such crimes could not exist any more. Thus the types of death of victims were re-declared, who were then buried secretly. People who wanted to clear up these deeds were prevented from doing so and sent to Siberia. In a similar way, in the DVNLP and GNLC with the NLP and Wingwave seminars, the nimbus of a way of life and being is to be marketed, in which something like abuse of power no longer occurs, since in NLP no power is exercised in terms of content, but only in terms of process, and in Wingwave the myostatics test announces what and how to work on - and it cannot lie.

preservation and the structures of power one must not be hesitant and not be squeamish in cases of abuse of power: One must act with courage and determination, because the successful spreading of the belief in NLP, Wingwave or NLC unfortunately also justifies human sacrifices.

### The curse of the evil deed: involvement of the GNLC in the "Causa DVNLP"

Among other things, Cora Besser-Siegmund and four of her "Causa DVNLP"-members have been awarded with the honorary membership and the honorary prize in the DVNLP a year ago, because she has been responsible for the development of the culture of protection of perpetrators in the DVNLP, which she has now brought into the GNLC.

At least three years before the DVNLP "causa" escalates to 2014, Cora Besser-Siegmund has already become part of the conflict between two DVNLP members, which can be regarded as the initial and core conflict of this causa. This was created between XY as a course attendant of my DVNLP Master Course 2010/2011 and a participant of this course, who filed a complaint in 2013 in the DVNLP against this course attendant for abuse of power and crimes against sexual self-determination.<sup>11</sup>

XY, whom I had warmly recommended as a psychotherapist and coach to the participants of my DVNLP Master Course, began an abusive relationship with the participant in question at the beginning of 2010 in the tutor role as course assistant and also as her psychotherapist and coach. XY is decompensated for this abuse relationship in need of treatment - according to his psychotherapist and Wingwave trainer, Cora Besser-Siegmund, who treated XY for "*quite serious depressive decompensation*" as part of her health insurance approval.

During the one-year master course, XY was involved with the complainant in very different roles: In addition to his tutor role as course assistant, he was her psychotherapist and coach, her employee in her youth welfare agency and her training institute, a special system and family coach for her employees and for her children, and furthermore her agent for secret assignments as escort within and outside of the master course.

Together with the diagnosis of "*depressive decompensation*", the psychologist Cora Besser-Siegmund published her "expert" opinion on the aetiology of these symptoms within the DVNLP in March 2014<sup>12</sup>: "*This was triggered by the aforementioned*

---

<sup>11</sup> See the report "*Background to abuse complaints*".

<sup>12</sup> Interestingly, this indiscretion ran over me, her former, fatherly trainer (in Gestalt and NLP wipe 1979 and 1987) - as if she had known that I would not publicly use this indiscretion against her. In 2014, I actually did not yet do so, when Cora Besser-Siegmund, together with Martina Schmidt-Tanger, Dr. jur. Jens Tomas and Stephan Landsiedel, protected XY against me and the complainant with the help of insidious attacks. I had entrusted this information exclusively to the DVNLP association leadership Martina Schmidt-Tanger and Dr. jur. Jens Tomas, so that they could initiate a corresponding multiple-party mediation *within the association*. Unfortunately, however,

*relationship* [XYs to the complainant]. With this statement about causing the desolate condition of her patient and Wingwave protégé XY, Cora Besser-Siegmund quasi exculpated him as an abusive psychotherapist and coach in the DVNLP - this relationship would have "finished him off", she essentially says with this. The fact that DVNLP Teaching Trainer XY has exceeded all professional ethical limits in the course of an abuse of power and thus acted to the detriment of his patient and client is not mentioned in this communication. It appeared that Cora Besser-Siegmund was more concerned here with attributing blame to the complainant as a DVNLP member, with whom she herself, as a DVNLP teaching trainer, was involved in personal conflicts together with DVNLP member XY.

In so doing, she expressed an indirect attribution of guilt to a person "close to her psychotherapy patient" (through me) within the meaning of the Professional Code of Conduct of the Chamber of Psychotherapists,<sup>13</sup> to another person "close to him" (the complainant). By this statement, which violated the psychotherapeutic abstinence commandment and indirectly attributed blame for the mental state of her patient XYs to the complainant - not only in her private but also in her professional (DVNLP) context - she did not violate the personal rights of XYs, but above all those of the complainant.

Cora Besser-Siegmund's psychotherapy with XY, she writes in our mail exchange in March/April 2014, first took place in 2011, "*when he and ... [the complainant] had a relationship*", and then again from the beginning of 2014. XY resumed therapy with her at the time when the complainant made serious allegations of abuse and bullying against him and some participants in the master group at the time and in connection with these allegations the conflicts in the DVNLP escalated. Due to the complete loss of neutrality of the board of directors, these conflicts, from which Cora Besser-Siegmund could hardly stay out of<sup>14</sup>, became the "DVNLP cause", which basically consisted of the fact that XY was unilaterally supported by Cora Besser-Siegmund and his other helpers in the association and at the same time hidden from the public. Cora Besser-Siegmund's breach of confidentiality in the DVNLP probably contributed considerably to this escalation and its outcome, the exclusion of the complainant, which is contrary to the statutes and the law, since she indirectly stigmatises the complainant as a woman with whom it is better not to have a relationship because otherwise one could possibly also magically suffer a "depressive decompensation".

---

they did not do so; instead, they allied themselves with Cora Besser-Siegmund and the complainant's other partners in the conflict in order to exclude her and me from the DVNLP by criminal means.

<sup>13</sup> Since Cora Besser-Siegmund has manifestly infringed them, the appellant and I have lodged a corresponding complaint against her with the Psychotherapeutic Association, before whose Board of Appeal she will probably have to answer. For the details of these violations see the chapter "*Questionable psychotherapy at the beginning of the 'cause DVNLP'*" in "*My beautiful delinquent German Association! DVNLP completes perpetrator-victim conversion*".

<sup>14</sup> See footnote #13.

At the very least, Cora Besser-Siegmund's indiscretion within the DVNLP did not contribute to a conflict resolution within the association, but rather to the decision of the board of directors that the alleged wife-beater and sex offender XY must be protected from the complainant. The DVNLP leadership succeeded very effectively in doing just that by officially criminalizing and pathologizing her as a mentally disturbed false accuser - i.e. through a radical victim-offender-reversion process conducted by the DVNLP, which the executive board<sup>15</sup> synchronized with a victim-offender-reversion process already initiated against the complainant outside the DVNLP.

As his Wingwave instructor and psychotherapist, Cora Besser-Siegmund knew at that time about the difficult personal and group dynamic situation into which XY, hiding from me as his instructor, had brought himself with the complainant and others, with both participants entangled in problematic relationships. In the said exchange of e-mails with her, I criticized the indiscretion of her statement that the depressive decompensation of her patient XY *"was triggered by the said relationship [of the complainant with him]"* in this way:

*"Had you had more time for this mail [in which she made this guilty statement], you would have surely formulated it differently. Even if only to exclude that this sentence could be misunderstood as meaning that not only the relationship with [the complainant] had triggered his serious depressive decompensation, but that [the complainant] himself had triggered it. With a little more time, you would have formulated this statement more systemically, with a somewhat higher resolution of the depth structure: "Your patient [XY] was resigned and saddened to have been confronted with and at the mercy of problematic aspects of himself in a relationship constellation which he could no longer eliminate or integrate.*

*"He himself staged this constellation of relationships as a companion in the relationship with the participant ... [the complainant], which had been hidden from me for one and a half years, in systemic co-creation with ... [the complainant], with the less presentable sides of other course participants and with me - as a leader who was actively kept ignorant with lies. And in close cooperation with key persons in their network of violent and exploitative relationships, of which, according to ... [the complainant], he became an important part, after ... reports that were credible to me. ... [XY] worked together with someone who, according to court records, has been threatening to murder me and [the complainant] for two years, also according to police reports, and who, together with others, has been charged with serious offences by [the complainant].*

*"In order to avoid further injunctions being sought against me by ... [XY], I am not allowed to tell you what specific offences are contained in ...'s [complainant] reports*

---

<sup>15</sup> For details see *"My beautiful delinquent German Association!" DVNLP completes perpetrator-victim-reversion*, *"Perpetrator Association DVNLP - Silence, Denial and Repression"* and *"Dossier Perpetrator-Victim-Repatriation"*.

*against him and the other persons he has reported. I am, however, allowed to inform you that I have reported him [XY] for failure to provide assistance and for abuse of power within an asymmetrical educational, psychotherapeutic and coaching relationship.*

*"I hope for ... [XY] that he can work through this understandably depressing, guilty entanglement with you. And I hope that you will be able to help him with all your skills to organize the resources he needs to face his guilt and to turn around and to acknowledge the need for compensation for the people who have suffered considerable damage because of him. These are also ... [the complainant]'s children whom she has not been able to see for two years [in 2017 for more than five], to which, according to her credible reports, ...'s [XYs] complete immersion in the existing structure of her network of relationships has contributed decisively.*

Not only was Cora Besser-Siegmund informed via this e-mail about XY's power-abusive training, psychotherapy and coaching relationship with the complainant, but also about a publication<sup>16</sup> in the complainant's blog, which contained, in addition to her correspondence with the board of directors, which she felt had behaved badly, also a copy of her application<sup>17</sup> for referral of her complaint against XY submitted to the DVNLP Arbitration Commission on 23 August 2013.

When the complainant asked Cora Besser-Siegmund at the beginning of 2014 whether she would be able to take the supervision lessons she needed to obtain her teaching trainer licence, Cora Besser-Siegmund replied, *"It was important to me, To tell you the reason for the therapy at that time [the depressive decompensation of XY was triggered by his relationship with the complainant], so that you understand that ... [the complainant] would not be in good hands with me for teacher-coachings and that I am therefore not the right person to coach ... [the complainant]. It wouldn't have been ok that I offered her these hours and she only found out later or even by chance that [XY] was my patient in 2011 and is back now.*

This thoughtful-sounding statement by Cora Besser-Siegmund makes it clear that she had taken the complainant's side in conflict XY/complainant and that assistance in initiating any kind of internal conciliation or mediation was obviously not an option for her. Three months later, as mentioned above, she even took the side of her

---

<sup>16</sup> I informed Cora Besser-Siegmund by e-mail of this "self-defence" publication by the complainant, who was disenfranchised, criminalised and pathologised in the association, with the instruction to download it quickly before the DVNLP "collects it by injunction". Cora Besser-Siegmund did not, as I hoped, take note of this publication as an information background in order to advocate a fair intra-association mediation of the conflicts in the DVNLP (of which, as is clear today, it was an essential part), but to use it specifically against the complainant, by leaving my e-mail reference to this publication to XY, so that he could put me, as an assistant to the complainant, together with her in a criminal light in court.

<sup>17</sup> See under "Materials for Processing in the DVNLP": *"Complainant's request to the Arbitration Commission not dealt with in accordance with the Statutes"*.

Wingwave training candidate and patient XY so clearly that she supported<sup>18</sup> him outside the association in the latter's judicially conducted slander campaign against the complainant and me - secretly and together with the other DVNLP perpetrators, who had their own and probably equally obscure motives for "disposing" of the complainant from the DVNLP.

So Cora Besser-Siegmund knew about the conflicts that XY, as an assistant in my master course, had with the then student, whose psychotherapist and coach he was at the same time. XY obviously could not solve these conflicts, neither alone, nor together with the participant, nor with his therapist Cora Besser-Siegmund and the participant together.<sup>19</sup> Even I, as his teacher and trainer, could not help XY, as he had hidden his problematic and ethically questionable relationship with the participant from me and his real need in his relationship with her behind an elaborate construct of lies<sup>20</sup>.

In contrast to me, Cora Besser-Siegmund already knew at that time about the plight of her patient and Wingwave assistant. But his strong inner conflict towards me, which I was<sup>21</sup> not only his current and former instructor, but also her own former instructor, XY could obviously not solve in the years 2010 to 2012 with the help of his Wingwave instructor and psychotherapist Cora Besser-Siegmund - or better, was only able to "solve" it in such a way that not he, but the complainant informed me shortly before the end of the one-year master's course about her relationship with XY - and very much later also about XY's dubious activities and business in the background of my master's course that involved the complainant in a problematic way.

XY accompanied and attended NLP and constellation courses with me until the beginning of 2013. Obviously Cora Besser-Siegmund could not or did not want to

---

<sup>18</sup> See footnote #16.

<sup>19</sup> According to the reports of the complainant suppressed in the DVNLP, during and also before his psychotherapy in 2011, the problematic relationship in my master course was the subject of a discussion between XY, Cora Besser-Siegmund and the complainant. Cora Besser-Siegmund would not have tried to persuade her and XY to inform me about their difficult relationship in my master's course, which involved other participants in a group-dynamic problematic way - which became the starting point for a violent mobbing against the complainant. She would have said to them that *she* would speak to me about it - but she did not.

<sup>20</sup> The complainant reports that, as XY's client for staff coaching and group sessions in her company and also as a person painfully affected herself, she had spoken to him about his problems with violence and women, which had also become apparent in his coaching and group training sessions. The inner conflict of XY towards me would also have included whether or not he should confide in me, even with his tendency to violent abuse of his "office" as psychotherapist and coach.

<sup>21</sup> How XY experienced and processed this kind of pathological triangulation, spoken in a family analogy, he may tell the Complaints Committee of the Psychotherapeutic Association, if they question him as a patient injured by the psychotherapist Cora Besser-Siegmund.

encourage Wingwave Assistant XY, who belongs to her institute, to talk to me about his abusive psychotherapeutic NLP and Wingwave sessions in the background of my master course. Rather, it seems that Cora Besser-Siegmund encouraged her Wingwave assistant and patient XY to deny the abuse allegations made against him in the DVNLP and in court. And above all, it also seems as if she has turned a blind eye to the "trivial offence" of a power-asymmetrical relationship with his client and patient, for which he might have been punished enough by his depressive decompensation. This would at least correspond exactly to the attitude which the systemically naive, apparently confused and overstrained<sup>22</sup> DVNLP board of directors has probably adopted towards member XY in the "DVNLP case", who violated § 174 c of the German Criminal Code - since the indirect assignment of blame made by her as a psychologist fitted in well with the pathologizations already spread by her psychologist colleague Martina Schmidt-Tanger in the DVNLP, which denigrate the person of the complainant.

While the DVNLP board of directors, astonishingly uninformed in these matters, had assumed that a DVNLP course assistant as NLP coach and also as psychotherapist (HP) can enter into an intimate relationship with a participant in a quite and ethically unobjectionable way (even hidden from his DVNLP course leader), Cora Besser-Siegmund, as his licensed psychological psychotherapist, will have known that it was not only a difficult course-assistant-participant relationship, but also a justifiable abusive psychotherapist-patient relationship. After all, she was so well informed about them that, with regard to his "*depressive decompensation*" through me, her new partner, she spread her psychological expert opinion into the professional and also private relationship system of the complainant that the cause of the desolate psychological state of her previous relationship partner XY would be his "*relationship*" with the complainant. However, she did not mention the problematic and complex role mixes in his professional relationship with XY, who is primarily responsible for her coaching and psychotherapy.<sup>23</sup>

---

<sup>22</sup> Who, in his confusion and excessive demands, acted criminally when he told *the SPIEGEL* in a DVNLP statement, "*Thies Stahl is one of the outstanding personalities of NLP. The board is all the more shocked by the depths to which Mr. Stahl has gone to save the honour of his life companion...*" The DVNLP forgot to mention which of the crimes committed against the complainant in the DVNLP (among others as a consequence of the conflict-stricken psychotherapist and Wingwave trainer Cora Besser-Siegmund) made my rescue attempts necessary.

<sup>23</sup> What her personal conflict with the complainant was about and what interesting "triadic" role mixing she was involved in with XY and the complainant, i.e. what ultimately caused her to violate the abstinence rule so seriously in this relationship triangle, will probably have to be explained by Cora Besser-Siegmund to the Board of Appeal of the Psychotherapeutic Association. It is very unlikely that she will tell there that she actively intervened, in the real life of her patient outside the therapy situation and even in a court case, in the existential conflicts of her patient with his former intensive care relationship partner, whom she had never met personally and of whose existence she only knew from the reports of her patient in his therapy sessions.

Cora Besser-Siegmund might of course want to claim that when she resumed the psychotherapy of 2011 with XY at the beginning of 2014, she did not know about his abuse relationship that was hidden in my master course 2010/11. But she probably won't do that, because then she would have to admit that she has been deceived and lied to not only by her psychotherapy patient XY, but also by her long-time Wingwave training candidate and assistant XY. But to admit that you have been lied to and cheated by a long-time training candidate is not easy - as I<sup>24</sup> know from my own experience with XY. Such an admission would certainly be even more difficult for Cora Besser-Siegmund than it was for me at the time. After all, XY was not only her Wingwave training candidate, but also extensively her coaching client and psychotherapy patient.<sup>25</sup>

### The "cause DVNLP" is the "cause GNLC"

The founding of the GNLC took place in 2014 at the same time as the escalation of the "DVNLP case" and the membership and human rights violations committed against the complainant under the joint responsibility of Cora Besser-Siegmund in the DVNLP in favour of her protégé XY. The cover-up of her contributory cause of this causa and the grand coalition of denial, concealment and suppression that her GNLC and the DVNLP have entered into with each other probably sealed Cora Besser-Siegmund's decision to accept DVNLP honorary membership: At the latest with this questionable honouring the "Causa DVNLP" became the "Causa GNLC".

The "cell division" of the DVNLP into these now two psycho-method associations, DVNLP and GNLC, has perpetuated Cora Besser-Siegmund's joint responsibility for the crimes of the DVNLP case as a "genetic" legacy. This, and the fact that she continues to protect the DVNLP coach, psychotherapist and DVNLP Teaching Trainer XY in her Wingwave and NLC environment, who is presumably dangerous for his clients, and has even made him a GNLC accredited NLC Teaching Trainer, perpetuates the tabooing of the NLP/NLC affinity for violence<sup>26</sup> in DVNLP, and thus probably also in the GNLC. And this is, besides the betrayal of the original concept of

---

<sup>24</sup> Four years ago, in order to protect the complainant who had been harmed by XY, I publicly admitted that I had overlooked something as crucial as a textbook-like complete "Jekyll & Hyde" dissociation in a trainee.

<sup>25</sup> In addition, Cora Besser-Siegmund would probably have to answer some theoretically demanding questions about the reliability of the myostatics test, which the Wingwave-NLC praises as a "compass to the solution", with the help of which the therapist can quickly find the topics that should be worked on. Cora Besser-Siegmund would have to explain under which transmission-countertransmission and personal involvement conditions the muscle test as the basis of all Wingwave and NLC interventions can lose its reliability.

<sup>26</sup> See *"Violence, abuse, double standards and the return of the repressed in the DVNLP"*.

the NLP of ecology<sup>27</sup>, the real disservice that Cora Besser-Siegmund and her "Causa DVNLP" accomplices have done to the NLP - and thus of course also to her NLC.

---

<sup>27</sup> The DVNLP and GNLC leaderships, who have become amnesiacs for their exemplary function, have sacrificed the NLP basic concept to ecology. With this they have betrayed the heart and spirit of NLP. These psycho-associations of stupid-bourgeois double standards have unceremoniously disposed of a woman who had the courage to point out in her complaint something that is not in order in the common theoretical and socially lived system of the organized NLP and NLC and urgently needs to be checked, in a radical perpetrator-victim-reversion process. It's as if an annoyed officer on duty in a complex technical facility that is potentially dangerous for the environment were to smash an important display instrument with targeted hammer blows - and thereby risk the super-GAU of this facility.
